DETAILED ACTION

1. This Office Action is in response to the Amendment filed on October 5, 2006, which paper has been placed of record in the file.
2. Claims 1-22, 40-45, and 87-103 are pending in this application.

Election/Restriction

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-22 and 40-45 drawn to a method and system for matching carrier capacities with shipper loads classified in class 705, subclass 37.
 - II. Claims 87-103 drawn to method and system for matching carrier capacities with shipper loads comprising first carrier interfaces, second carrier interfaces, third carrier interfaces, fourth carrier interfaces, fifth carrier interfaces, classified in class 705, subclass 37.
4. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed such as comprising **first carrier interfaces, second carrier interfaces, third carrier interfaces, fourth carrier interfaces, fifth carrier interfaces**, do not require the particulars of the subcombination as claimed. The subcombinations **selecting a plurality of units capacity, assigning a group identifier, generating a bid**, have separate utility.

Art Unit: 3692

5. Because these inventions are independent or distinct for the reasons given above and there would be a serious burden on the examiner if restriction is not required because the inventions have acquired ***a separate status in the art due to their recognized divergent subject matter***, restriction for examination purposes as indicated is proper.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
